## AUTHOR INDEX

Ajami, M. 241
Amy, J.W. 31
André, J. 1

Beynon, J.H. 223, 233
Bier, M.E. 31
Brenton, A.G. 223
Burgers, P.C. 141

Ceja, P. 31
Chatfield, D.A. 241
Cooks, R.G. 31, 49
Craig, A.G. 173

Dehareng, D. 187
de Koning, L.J. 95
Drewello, T. R3

Fokkens, R.H. 95
Forbes, R.A. 107
Freiser, B.S. 107

Geno, P.W. 75
Griffiths, W.J. 233, R7
Grix, R. 49

Håkansson, P. 123, 173
Harris, F.M. 233, R7
Hedin, A. 123
Holmes, J.L. 141

Kapała, J. 13
Kingston, R.G. 223

Lebrilla, C.B. R3
Lech, L.M. 107
Lorquet, J.C. 187

Macfarlane, R.D. 21, 75
Martin, W.B. 203
Mosburg, E.R. Jr. 1

Nibbering, N.M.M. 95

O'Malley, R.M. 203

Petitjean, S. 187
Pinkse, F.A. 95
Platzner, I. 155
Pollinger, P. 63

Remacle, F. 187
Rüdenauer, F.G. 63
Ruttink, P.J.A. 141

Salehpour, M. 173
Schey, K. 49
Schwarz, H. R3
Skudlarski, K. 13
Stafford, G. 31
Stahl, D. R3
Steiger, W. 63
Studnicka, H. 63
Sundqvist, B.U.R. 123, 173
Syka, J.E.P. 31

van Lenthe, J.H. 141
Vedel, F. 1
Vedel, M. 1

Whitten, W.B. 165

Zoeller, J.H. Jr. 21

# INTERNATIONAL JOURNAL OF MASS SPECTROMETRY AND ION PROCESSES, VOLUME 77 (1987)

## SUBJECT INDEX

aromatic ions
  electron-capture reactions of multiply charged polycyclic — 223

binary systems
  the mathematical representation of mass spectrometric data of — 13
biomolecules
  secondary ion multiplicities and correlations in fast heavy ion-induced desorption of — 123

$CHO_2^+$ ions
  an ab initio study of the isomerisation and fragmentation of —: an example of spin-controlled reactions? 187
$^{252}$Cf-plasma desorption mass spectrometry
  fragmentation in —. 2. Polynuclear aromatic hydrocarbons 21
$^{252}$Cf-plasma desorption mass spectrometry
  — using a Mamyrin reflectron in a low voltage regime 75
$\overset{+}{C}OH$
  on the dissociation characteristics of $H_2\overset{+}{C}OH$ ions and their participation in the $H_2$-catalysed isomerisation of — to HCO 141

desorption of biomolecules
  secondary ion multiplicities and correlations in fast heavy ion-induced — 123
detection limits
  improved — for a time-of-flight mass spectrometer with a surface ionization source 241

endothermic reactions
  study of — involving transition metal ions; the FTMS analogy of the ion-beam experiment 107

fragmentation
  — in $^{252}$Cf-plasma desorption mass spectrometry. 2. Polynuclear aromatic hydrocarbons 21

$H_3^{\cdot}$
  experimental evidence for the stability of the $NH_4^{\cdot}$, $H_3O^{\cdot}$, $H_3S^{\cdot}$, and — radicals by neutralization–reionization spectroscopy 233
$H\overset{+}{C}O$
  on the dissociation characteristics of $H_2\overset{+}{C}OH$ ions and their participation in the $H_2$-catalysed isomerisation of $\overset{+}{C}OH$ to — 141
$H_2\overset{+}{C}OH$ ions
  on the dissociation characteristics of — and their participation in the $H_2$-catalysed isomerisation of $\overset{+}{C}OH$ to HCO 141
high front- and back-end resolution MS/MS
  — in Fourier transform ion cyclotron resonance mass spectrometry 95
$H_3O^{\cdot}$
  experimental evidence for the stability of the $NH_4^{\cdot}$, —, $H_3S^{\cdot}$, and $H_3^{\cdot}$ radicals by neutralization–reionization spectroscopy 233
$H_3O^+$ and $H_3O^-$ ions
  energetics of charge-inversion reactions of — R7
$H_3S^{\cdot}$
  experimental evidence for the stability of the $NH_4^{\cdot}$, $H_3O^{\cdot}$, —, and $H_3^{\cdot}$ radicals by neutralization–reionization spectroscopy 233
hydrazine dication
  experimental and theoretical evidence for the generation of a stable — in the gas phase R3

indium liquid-metal ion source
  mass and energy spectra of a capillary-type — 63
ion cloud stored in an rf trap
  a time-of-flight method for studying the properties of an — 1

lead isotope measurements
  recent data on — 155

Mamyrin reflectron
  $^{252}$Cf plasma desorption mass spectrometry using a — in a low voltage regime 75

mass spectrometric data
the mathematical representation of — of binary systems 13
molecular ions
rotationally sensitive focusing of — in an a.c. quadrupole electric field 165

$NH_4^{\cdot}$
experimental evidence for the stability of the —, $H_3O^{\cdot}$, $H_3S^{\cdot}$, and $H_3^{\cdot}$ radicals by neutralization–reionization spectroscopy 233

plasma desorption mass spectrometry
liquid sample – 173
polycyclic aromatic ions
electron-capture reactions of multiply charged — 223
polynuclear aromatic hydrocarbons
fragmentation in $^{252}$Cf-plasma desorption mass spectrometry. 2. — 21

secondary ion multiplicities and correlations
— in fast heavy ion-induced desorption of biomolecules 123
spin-controlled reactions
an ab initio study of the isomerisation and fragmentation of $CHO_2^+$ ions: an example of —? 187
surface-induced dissociation
a tandem quadrupole mass spectrometer for the study of — 31
surface-induced dissociation
a tandem time-of-flight mass spectrometer for — 49
surface ionization source
improved detection limits for a time-of-flight mass spectrometer with a — 241

time-lag parameter
the importance of the — in a laser/time-of-flight mass spectrometer 203
time-of-flight mass spectrometer
improved detection limits for a — with a surface ionization source 241
transition metal ions
study of endothermic reactions involving —: the FTMS analogy of the ion-beam experiment 107
